appear to be quite simple. The most obvious ones are poor time management and procrastination. A lot of teens these days are illiterate in allocating and managing their time. It leads to incorrect study: rest ratio. In the end of the day they have little time left on important assignments and their duties, which then contributes to the rotation of excuses and not being able to focus on anything.

Mental and physical well-being are also major factors affecting ~~one's~~ ability to focus, determination and motivation. Many teenagers are under an immense pressure to perform academically, in a constant state of stress they often forget to take care of themselves. It <sup>can</sup> lead to sleep deprivation, unhealthy diet and bad habits.

Here are some practical tips and advices that may help you to stay healthy and focused:

- 1 To get rid of procrastination and poor time-management. ~~from now~~ I advise you to organize your schedule and write main goals for the day. This will help you to stay organized and <sup>be</sup> aware of all important assignments that you have.
  - 2 Don't forget to take care of your physical and mental health. Exercising, ~~keeping~~ maintaining healthy lifestyle, having a 7-8 hours <sup>of</sup> sleep - all counts! These practices will keep you ~~it will keep you~~ healthy, mentally and physically.
  - 3 Train your anterior mid singular cortex! This part of the brain is responsible for focus state, tenacity and determination. Make it a habit to read or <sup>do</sup> journaling every day and you will notice great results really soon!
- And the most important one is - believe in yourself and your abilities. Stay positive and do not ~~pay attention~~ <sup>well</sup> on negative moments ~~for too long~~ <sup>for too long</sup>. I believe in you!

Nowadays, people can have a several, several specializations, careers or methods of earning money. Humans can ~~choose~~ choose major and minor degrees which enhance chances to be employed. As a result, people will become clever and multi-task. The idea of having a single career is becoming an old fashioned one. I will explain why

First of all, when individuals finished major and minor degrees or two bachelor (undergraduate) degrees, person will become more creativity, multi-task, than person who finished just one career. For instance, in Italy, (usually) students finished two bachelor degrees. Italian students have more knowledge than (other) students who graduated in other countries. Humans can choose business administration which includes marketing, human resources, accounting, business analytic, and can choose supply chain management. As a result, they will be more clever and competitive. In the USA, students usually choose major and minor degrees. Major degree will <sup>provide</sup> more skills, knowledges about their profession, while in minor students will get a basic knowledge. In addition, students who have two degrees will have a good salary. For example, hr manager can be a translator. Hr manager can communicate with immigrants.

In conclusion, I will mentioned that in Italy students choose 2 undergraduate degrees, <sup>in</sup> the USA, Canada student choose major and minor degree which provides <sup>huge</sup> more opportunity. In developed country, the idea of having an one degree ~~became~~ became an old fashioned one. Nowadays, people should choose two careers.

Everytime when he finds any thing like photos or videos that connected w his memory about the time when he was a student. It means, his speech will during at-least one-two hours. I believe, furthermore, I agree that school years are the best time. But Study-Journey shouldn't be without breakdowns. I know it from my personal experience that students losing concentration, (don't) feeling of "I don't understand" - what is actually happening. And the main cause is comfort life. If we deep look to this problem, we can realize that the root is a comfort, or at-least we thing that is comfort. And I'm talking about gadgets, applications in it. I come face-to-face to it. I lost any motivation to study, to do something. I noticed, in spite of the fact that I was sitting and (wrote) did my homework, my mind was not there, I thought about taking my phone, open the "fire-tor" and just scrolling. One day, then week, gradually my efficiency feel down. In one moment I deep dive to the mind, why my motivation feel too low. I come with the reasons that social media were my problem. (It) dly addiction to phone, and apps in it leaded me to that overcome. And it is not only my problems around the world suffering from this addiction. And how students can stay concentrated on study, if their mind filled with too much unhealthy information... To resolve it, I tried many methods such as: pomodoro, 5+5+5 and so on. But the key was to avoid the cause, the root of all problems especially to delete apps. (But I know, that is a little (bit) bit stupid, but to come to this decision was pretty tough for me. Many years I use gadgets. And to cut connection isn't easy. First(things) things first, we should be honest with yourselves and detect <sup>where we</sup> our weak. After by little steps to get rid of negative factors. First, do not put phone to the table where you study, then set limit time to use applications. And you just can have high-level of concentration, and motivation to live, to explore, to study. And working for your goals that you want to achieve.
